# ***Birdhouse with Wireless IP Camera instructions***

## **What's in the Boxes**

Birdhouse in your choice of material and color

Wireless IP Camera premounted in the birdhouse

100 ft AC Power Adaptor

IP Camera Quick Guide

IP Camera Installation CD (user manual is included on the CD)

Ethernet cable

## ***Setting up the Wireless IP camera***

1. Before mounting the birdhouse, power up the IP Camera with the AC power adaptor.
2. Follow the instructions in the Quick Guide manual.

Note: Camera may also be used directly connected to a laptop/desktop. For this, a "crossover" cable is required. These may be purchased either through Spy On A Bird or your local electronics store.

## ***Setting up your Birdhouse***

Mount birdhouse in a desirable location. Remember to keep the birdhouse less than 200 feet from the router.

## ***Helpful Hints***

Always test the nestbox indoors before mounting outside.

During low light conditions, the IR LED's will automatically turn on, resulting in a black & white display.

To remove camera from birdhouse

1. Remove screw and lift the lid of the birdhouse.
2. Unplug power cable to the camera.
3. Unscrew camera counterclockwise until released.

This camera can also be used "wired". The plug is covered to prevent spiders from entering the camera. Remove the dummy plug for wired operation.

## **Warranty**

Every unit is tested and is guaranteed to work right from the box. Within the first 7 days, if you are not satisfied for any reason, please call us at 1-800-606-6428 and we will assist you in returning the items and issue a refund for the purchase price. Customer pays return shipping.

All electronics also comes with a 12-month warranty from the purchase date. In addition, all plastic lumber birdhouses and birdfeeders carry a lifetime warranty. Please retain your original invoice. Damage related to normal wear and tear is excluded from this guarantee. Sorry – squirrel damage is not covered under our policy
